Telemedicine Solutions

Leading Provider

INTELEMED is one of the leading Telemedicine Solutions providers in Canada and Northern America for patient virtual care Solutions. We serve different healthcare organizations and providers including hospitals, clinics, emergency services and more. Our Solution helps healthcare providers maintain patient satisfaction and retention, as well as enhance their clinical and financial outcomes.

We provide Telemedicine solutions based on our MedXpress virtual care platform that enables healthcare providers with clinical workflow, tools and technology that integrate directly into their operation model.

MedXpress Offers Real-time
Audio, Video and Imaging
Encounters under one Platform

At INTELEMED, we collaborate with your team to implement our Telemedicine solution, that supports patient care needs and empower your healthcare providers through ongoing support, and training.

MedXpress Web

A web platform that helps manage clinics and Doctors schedules, User-Friendly booking system and payments processing. Secured and encrypted, allows healthcare providers to receive real-time data, videos, images and audios from medical devices at the patient side.

MedXpress App

Allows patients to book and view their appointments with healthcare providers. App provides full Video and Audio encounters, where healthcare providers can diagnose and treat their patients remotely.

Mobile Virtual Clinics

Provide mobility for emergency and non-emergency applications. Integrated with MedXpress web platform. Two Types with different features are offered. "Carts and Portable" units. Units are offered with integrated PC or tablet, camera, speakerphone and medical devices.

Medical Devices

Intelemed offers wide range of medical devices and allows integration of other medical devices that can be integrated. Basic Medical devices offered include, Stethoscopes, Skin scopes, ENT Scopes, 3-in-1 Scopes, and others.

Our Telemedicine products and solutions offer fully integrated Software, Hardware, Mobile Equipment and Medical Devices, that help healthcare providers deliver state-of-the-art virtual care solutions to their patients, whether at their home, remote clinics, hospitals, longtime care facilities or in emergency situations.
